

## INSTRUCTIONS

Your web administrator should upload the arbella-badge.png to their server, which is also attached to this email.

Paste the snippet of HTML below into the desired location on the website:

```
<a style="position: static; cursor: pointer; margin: 5px; display: block; width: 178px; height: 54px; padding: 0; border: none;" href="http://www.arbella.com"></a>
```

The src attribute (source) of the img (image) element in the snippet should be edited to match the path of where the arbella-badge.png is saved/uploaded on the agent's server (just the highlighted portion in between the quotes) and should include the file name.
